Question 4 continued...

UNIVERSITY OF TORONTO

Faculty of Arts and Science

Midterm 1 CSC165H1S

Duration: 50 minutes
Instructor(s): David Liu, Toniann Pitassi

No Aids Allowed

Exam 44-1

Name:

Student Number:

Please read the following guidelines carefully!

- Please write your name on both the front and back of this exam.
- This examination has 4 questions. There are a total of 8 pages, DOUBLE-SIDED.
- Answer questions clearly and completely, with justifications unless explicitly asked not to.
- Unless stated otherwise, your formulas can use *only* the propositional connectives and quantifiers we have seen in class, arithmetic operators (like +, ×, and exponentiation), comparison operators (like = and >), and the divisibility and *Prime* predicates. You may not define your own sets or predicates unless asked to do so.
- All formulas must have negations applied directly to propositional variables or predicates (e.g., $\neg Prime(n)$). You do *not* need to show your work for computing negations.
- In your proofs, you may always use definitions of predicates. You may *not* use any external facts about rates of growth, divisibility, primes, or greatest common divisor unless you prove them, or they are given to you in the question.
- You may not use induction for your proofs on this midterm.

Take a deep breath.

This is your chance to show us
How much you've learned.
We WANT to give you the credit
That you've earned.
A number does not define you.

Good luck!
